

WHAT TRASH DO YOU SEE IN THE RIVER?

! Collected on the go

No matter where you go, there's litter almost everywhere: by the road, on the lawn, in ponds or rivers. Doing something about it is actually easy, and it can even be fun. Every time you go for a walk you can plan to pick up five pieces of trash and put them in the nearest trash can. Because anything you pick up can no longer pollute the environment. There are also a number of projects that support these trash collection campaigns, such as the "Unser Neckar" initiative in the city of Neckarsulm.
